

# When Your Vision Becomes Their Oasis

Draw on our new Woodlands™ metal ceiling finishes to make it happen.

# Tranquility. Comfort. Beauty.

Imagine stepping into a commercial building, embracing the warmth of rich and earthy woodgrain ceiling finishes. Maybe that first entry sparks a memory of escaping for a walk along a forest trail or through a nearby conservation area. Adding natural elements like wood finishes to the built environment has a unique way of deepening connection for a building's occupants and creating a sense of belonging to something beyond us or our work – and that's science talking.

So how do you apply the benefits of nature to the interior experience? By connecting it to the outside world with inspiring and cohesive design choices.

Bring the outside to a building's occupants with **Rockfon® Woodlands** metal ceilings finishes.

## Did you know?

Introducing wood to interior spaces:

- Lowers blood pressure and heart rate
- Is more effective at reducing blood pressure than introducing plants into a space
- Evokes the perception of warmth
- Deepens connections between occupants

# Bringing performance and aesthetics together.

Rockfon® Woodlands metal ceiling finishes give you the best of everything.

The Woodlands collection is a practical way to achieve the natural look of wood, with the durability and performance of metal. It – along with the entire lineup of wood-look metal ceiling products – offers the performance and durability of metal under humidity resistant, seismically rated and exterior wind load-rated systems.

This product line combines superior metal properties with woodgrain finishes to deliver excellent acoustics, performance and stunning appeal.

# Explore our Woodlands.

The Rockfon portfolio of metal ceiling systems is helping North American architects and designers craft the ideal and serene space for occupants.

Woodlands enables design professionals to blend aesthetics between interior and exterior spaces. This new product line includes four polyester baked-on, coil-coated woodgrain finishes inspired by nature's woodgrains that will perform indoors and outdoors. Achieve the perfect match and create an oasis in your next project with Rockfon® Woodlands.
